Red Cell Genotyping 2018
Patient Care

8:25am–4:15pm
8th Annual Symposium
Natcher Ruth Kirschstein
Auditorium • NIH Bldg 45
45 Center Drive
Bethesda, MD

To Register: visit Versiti.org/rcg2018 or call 414-937-6271

Short Description: This 8th annual symposium will review the laboratory aspects and clinical benefits of red cell genotyping in patients and blood donors.

Audience: Medical and laboratory professionals interested in clinical red cell genotyping applications for immunohematology and transfusion medicine.

Bringing emerging technologies to the bedside to enhance patient care.

Tia Wilson bravely battled sickle cell anemia. When she was just three years old, Tia had a stroke. She was hospitalized and began getting blood transfusions every four weeks. In June 2015 at the age of 7, Tia got a bone marrow transplant from her older brother and is doing great.
