

HEALTHY VOLUNTEERS NEEDED

According to the World Health Organization, approximately 584,000 people, including African children under the age of 5 years, died from malaria in 2013. A safe and widely effective malaria vaccine is urgently needed to stop the worldwide impact of this devastating disease.

Participation:

- Completely voluntary
- No cost associated with study-related tests for you
- Compensation may be provided

Researchers at the National Institutes of Health (NIH) Clinical Center in Bethesda, Maryland are seeking healthy volunteers to participate in an investigational malaria vaccine study.

You may be eligible if you:

- Are a healthy male or non-pregnant woman between the ages of 18 - 50 years
- Have not travelled to a malaria region in the last 10 years
- Have not received an investigational malaria vaccine in the last 5 years
- Will be available for the duration of the study

Participation will involve:

- A screening visit
- Frequent clinic visits to the NIH over a 7 month period
