

Lymph Node Biopsy Study

Doctors at the National Institutes of Health are conducting a research study (92-I-0125) to learn more about the immune system and how it responds to HIV infection in blood, lymph nodes, and bone marrow. We are seeking healthy volunteers to have a lymph node biopsy to compare with patients who have HIV.

To participate, you must:

- Be 18-59 years of age
- Be in good health
- Be HIV negative
- Not have Hepatitis B or C
- Have a lymph node that can be felt

As part of this study, volunteers will have up to 5 outpatient visits (including a lymph node biopsy).

Compensation will be provided.
