

Is Alcohol Affecting Your Life?

If you or someone you know is drinking too much, the National Institutes of Health (NIH) may be able to help. We conduct studies on how alcohol affects the body and are looking for new ways to treat alcohol problems. If you qualify, you can receive alcoholism treatment while you participate in our research.

The NIH Clinical Center is America's Research Hospital and is located in Bethesda, Maryland, on the Metro red line (Medical Center stop)
