

# Research Study

## Healthy Volunteers Needed

The National Institutes of Health (NIH) seeks healthy volunteers to participate in a research study for the collection of blood components such as platelets and plasma. Doctors are studying new techniques needed to develop gene therapy and other treatments for certain inherited immune system diseases. All participants will be screened with a medical history, physical examination, blood and urine tests. There is no cost for study-related tests and exams. Compensation will be provided.

### **You may be eligible if you:**

- Are 20- 40 years old
- Are in good health
- Are willing to allow blood samples to be stored for future research

### **You may not be eligible if you:**

- Are pregnant or breast feeding
- Have chronic liver or kidney disease
- Are HIV positive

**Location:** The NIH Clinical Center, America's research hospital, is conveniently located on the Metro Red line (Medical Center stop) in Bethesda, Maryland.
